HOW DOES THIS WORK?

×

In the center of the map, there is one central circle. That is your RECOMMENDATION BASE: the element that your recommendations will be based on. If you want to look at recommendations based on everything you like, you can set your profile as the recommendation base. But if you only want to see movies and shows similar to those on a particular collection, you can set that collection as the base instead!

On the left sidebar are the RECOMMENDATION CHARACTERISTICS. Select some, and you'll see new movies and TV shows appear on the map, based on whatever you selected. Is there some characteristic you don't want recommendations for? Just deselect it!

The map itself is pretty simple too.

Each solid line is a recommendation characteristic. Using the recommendation base, we'll look for movies and TV shows that share the characteristics you're looking at.

If one movie or show shares multiple characteristics, there will be dotted lines connecting that title to the other titles which have that characteristic. That way, it's sort of in both locations.

Have fun, and get watching!
